SUMMARY

4th semester BS Artificial Intelligence student building practical machine learning skills through a live ML engineering internship, 22 completed certifications, and consistent daily coding practice. Comfortable with the core Python data stack and currently deepening skills in machine learning, applied AI systems, and agent based workflows.

EDUCATION

BS Artificial Intelligence, University of Science and Technology Bannu (USTB), Bannu, KPK, Pakistan *4th Semester, in progress*

EXPERIENCE

Machine Learning Engineer Intern, FlyRank.ai (Remote) *July 2026, Present*

- Contribute to a content scoring initiative covering roughly 30,000 pages, using features including traffic trend, engagement metrics, and content age
- Built the task framing and data contract for the project, defining unit of analysis, dev and test splits, proxy labels, and a leakage trap experiment
- Compared Logistic Regression, Decision Tree, and Random Forest models using client grouped holdout evaluation, reaching a Precision at 50 of 0.74
- Completed a parallel AI Fluency portfolio track covering agent design, Model Context Protocol integrations, and multi step workflow automation

PROJECTS

100 Days of Code Challenge, Personal, self directed *Ongoing, 2026*

Building one Python project per day to strengthen core programming fundamentals, documented publicly with daily write ups.

- 16+ standalone projects including a password generator, student grades manager, journal logging app, and recipe viewer, covering file handling, exception handling, and list comprehensions
- Full project list and source code available on GitHub

SKILLS

Languages and libraries: Python, Pandas, NumPy, Matplotlib, Scikit learn

Currently building: Machine Learning (supervised and unsupervised), Deep Learning, LLMs, RAG, LangChain, AI Agents, MLOps, Docker

Soft skills: Problem solving, analytical thinking, communication, adaptability, time management, attention to detail

CERTIFICATIONS (22 completed, Coursera)

- IBM: Python for Data Science AI and Development, Data Science Methodology, Data Visualization with Python, Tools for Data Science, and 5 more
- University of Michigan: Programming for Everybody, Python Data Structures, Using Python to Access Web Data, Capstone in Retrieving, Processing and Visualizing Data with Python
- University of London: Problems, Algorithms and Flowcharts, Statistics and Clustering in Python, Data Science Project Capstone
- Google: Foundations of Data Analytics, Ask Questions to Make Data Driven Decisions, Prepare Data for Exploration, Process Data from Dirty to Clean

Full certificate list with verification links available on portfolio site.
